

Steintec[®]
paving systems
by **tuffbau**[®]

Paving systems and modular pavements in public spaces that look outstanding and prove enduring are no accident. They're achieved by a unique blend of premium products and people know how.

Our Products:

tuffbau high performance products are specified and used in prestigious, iconic and technically demanding projects worldwide.

These include O'Connell Street in Dublin, Eire, which has successfully endured the relentless onslaught of 500 buses a day for well over a decade, to the £32 million rejuvenation of Exhibition Road in London, the European Investment Bank in Luxembourg, Jaffa Road in Israel and other large-scale projects in Qatar, Australia and New Zealand. Confidence in the performance and reliability of our brand speaks for itself.

tuffbau offers high-performance and proven solutions for both bound and unbound pavements, setting standards worldwide. Our reputation is built on tradition and quality, yet we continue to evolve and innovate in line with changing market trends and the diverse demands of the professionals that specify our products and the contractors that use them.

Carefully tested paving products and specifications for public realm and streetscape projects ensure jobs meet essential performance criteria, including a long life and cost-effective maintenance. We recognise the importance of ensuring jobs are cost-effective and are environmentally sustainable.

Greenwich Maritime Museum, London

The Shard, London

Our People:

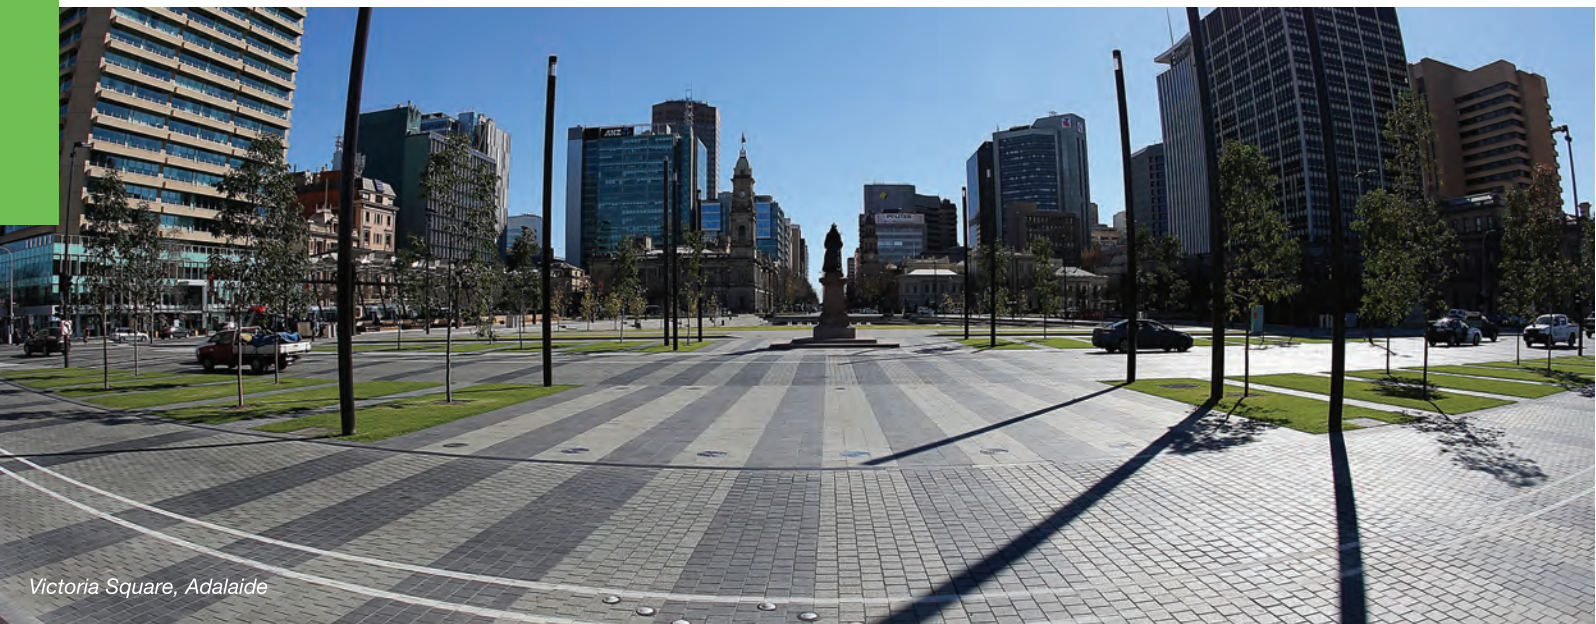

The tuffbau team pulls together unparalleled experience in the paving industry and proven international systems to deliver paving solutions for streetscapes that are truly world class.

The experts at tuffbau are innovators, market leaders in research and development and are respected worldwide for the company's technical ability and knowledge of paving projects and materials.

The team is passionate about segmental stone pavements and streetscape environments and can help engineers, landscape architects, specifiers and professional paving contractors in all aspects of a project, from design concept and specification to implementation.

We recognise the importance of using proven paving systems and materials that meet key performance criteria and internationally recognised standards to ensure that completed pavement projects are long-lasting and maintain their good looks.

The team has extensive experience in international projects where paving durability, longevity and visual appeal have been crucial. recognising that paving projects are a costly investment, and a life-cycle of outstanding performance are crucial to their long-term economic viability.

Victoria Square, Adelaide

Our core values are shaping the culture and defining the character of urban projects in a sustainable environment. Our ongoing focus on paving product and system developments contribute to this goal.

We continue to consult extensively with civil engineering specifiers, urban landscape architects and local Government bodies, including their consultants, for major paving projects around the world.

tuffbau can provide expert pavement advice and product support for highly technical pavement applications and has a proven track record with both private development and local-government supply.

Technical ability and proven paving products lead not only to projects of world class standard; the company has also focused on labour requirements and a more efficient use of materials and systems with the kind of workability that allows faster installations - a key issue in programme completion.

The key is providing a complete package - proven and tested products, effective installation systems that provide workability and enduring results and specialist advice that ensures jobs go according to budget and achieve a superior result.
