

Steintec[®]
paving systems
by **tuffbau**[®]

Steintec is delighted to have secured its first job in Qatar as part of the ground breaking Msheireb Downtown Doha project which will transform the centre of the capital city. And having appointed CBS as a new local distributor to stock its products locally, the company will be capitalising on the quality and unique technical capabilities of its tuffbau range.

Msheireb is the world's first sustainable downtown regeneration project and will revive the old commercial district with a new architectural language that is modern, yet inspired by traditional Qatari heritage and architecture. Msheireb Downtown Doha will become a new social and civic hub in the city centre –

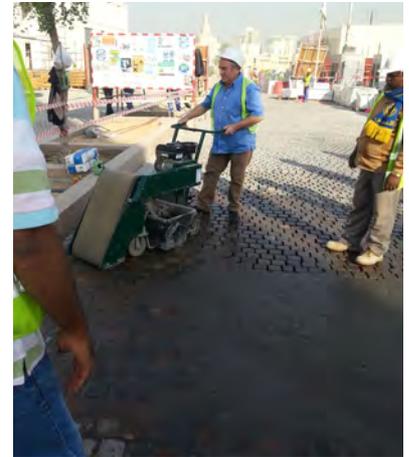

a place where it is enjoyable to live, work, shop, visit, and spend time with family and friends.

Using the latest in sustainable technologies, Msheireb will adhere to the highest standards in green building. The strategic objective of the Msheireb project is to reverse the pattern of development in Doha, which has tended towards isolated land use, reliance on car transportation and energy hungry structures.

The QR20 billion Msheireb Downtown Doha project to redevelop, regenerate and conserve the historical downtown of Doha, includes 31-hectares of mixed-use development situated in the centre of the city. It will feature premier office space, retail, leisure facilities, townhouses, upscale apartments, hotels, museums, civic services, and exciting cultural and entertainment venues.

Cars and traditional services are strategically placed underground in several basement levels, ensuring a pedestrian - friendly atmosphere. The project will also be served by a dedicated tramway.

About our distributor

CBS - Centerline Building Services - has been a registered Company in Qatar since March 2013 in a partnership with ACEC, Arabian Construction Engineering Company and is in business to meet the high demand for specialised applicators. ACEC is one of the oldest business institutions in Qatar and now combines 52 companies. CBS complements ACEC's service to many of its subsidiaries with maintenance, application and on-site service.
